

Staff Officer's Orientation

Operations Research Systems Analysis (ORSA) Division

6 Oct 05

Operations Research Systems Analysis

Where & What We Do

- **Provide quantitative analysis for decision-making (e.g. simulation)**
- **Provide automation/programming capability (e.g. TTP)**
- **Lean Six Sigma**
- **Support course of action analysis and modeling**
- **Help structure problem-solving methodologies**
- **Produce independent evaluation -- "honest broker"**
- **Maintain liaison with other DOD analytical agencies**

Telephone: 484-8656

FAX: 484-7348

Location:: Bldg 3002, Room 213

Email: 21TSC ORSA Official Mail AEROR @hq.21tsc.army.mil

Organizational Structure

LTC Thomas Flucker
Chief
DSN 484-8656

Ron Stanley
ETA (Jan 06)
DSN 484-7434

E-mail Address: AEROR@hq.21tsc.army.mil

Three Most Important Things to Remember About ORSA

- We can help you structure and solve problems quantitatively from the system's view.
- We can help you identify and/or evaluate possibilities for improving efficiency and/or effectiveness. Army is currently using [Lean Six Sigma](#). To accomplish this.
- Call us for help with:
 - statistics/quantitative analysis
 - problem formulation
 - forecasting/modeling
 - cost-benefit analysis
 - simulations
